

CSCI 597 Seminar in Computer Science Research.

Quiz 4: How to write and revise a winning paper.

1. when answering reviewer comments as you revise a paper, you should never disagree with the reviewer (true/false)

False

2. If the reviewer read your paper too quickly and missed a sentence where you had already answered her/his question, you can just point the reviewer to that sentence and not change the manuscript (true/false)

False

3. why could there be any problem in adding all the new studies and figures that the reviewers have asked for?

Editor may not like it.

4. once you have submitted your manuscript, you don't need to keep your data and/or code around (true/false)

False

5. when you have done changes to your revised manuscript in reply to a reviewer comment, you should clearly state in your answer to the reviewer where and how you did these changes (true/false)

True
